Weekly Market Summary

For the week ending February 11, 2022

Compared to last week, slaughter cattle were mixed with feeder cattle and stocker calves sharply higher. Dressed beef was lower while corn surged higher.

TCR's Cattle/Beef Indexes & Trendlines...

10 Day Index Trendline

Change from Previous Day: **-0.95%**

Change from 10 Days Ago: **+0.36%**

60 Day Index Trendline

Change from 60 Days Ago: **-1.44%**

Change from 60 Day High: **-3.27%**

Indexes track the daily market values for the past 10 & 60 days. Each value is the weighted total of the Gain/(Loss) for 15 major market factors compared to the previous trading day.

Slaughter Cattle: Trade in the South was steady at 140.00 and Northern dressed trade 2.00 higher at 224.00. In the 3 front months, Live Cattle futures closed from 0.18 to 0.70 lower. USDA's most recent carcass weight data showed weights were 3 lbs. heavier than last week at 928 lbs., 8 lbs. higher than a year ago.

Feeder Cattle: The national average price for feeder steers @ 162.81, 3.40 higher with trade mostly 2.00 to 5.00 higher. In the 3 front months, Feeder Cattle futures closed 0.12 higher to 0.72 lower.

Stocker Calves: The national average price for stocker steers @ 192.82, 4.80 higher with trade mostly 3.00 to 6.00 higher.

CME Feeder Cattle Index: 162.64, 2.47 higher than last Friday.

Boxed Beef Cutouts: Choice cutout 5.29 lower at 274.52 and the Select cutout 8.22 lower at 267.83. The Choice/Select spread was 6.69, 2.93 higher.

Cutter Cow Cutout: 0.87 higher at 231.84.

Slaughter Cows: Trade 3.00 to 5.00 higher.

Total red meat production under Federal inspection for the week ending Saturday, February 12, 2022 was estimated at 1108.7 million lbs. according to the USDA's Marketing Service. This was 3.0 percent higher than a week ago and 2.0 percent higher than a year ago. Cumulative meat production for the year to date was 7 percent lower compared to the previous year.

Grain: Corn was 0.30 higher @ 6.51 with March futures @ 6.5100, 0.3050 higher. Wheat 0.37 higher @ 7.94 and the futures @ 7.9775, up 0.3450.

This Week: 185

Last Reported: 426

Last Year: 106

Compared to last Monday: Feeder steers steady, Feeder heifers 1.00-3.00 higher, Good demand for feeder classes. Slaughter cows 3.00-5.00 higher, Slaughter bulls steady, Good demand for slaughter classes.

Tuesday Auctions:

Lonestar Stockyards - Wildorado, TX

This Week: 627

Last Reported: 1,599

Last Year: 1,254

Compared to last week: Steers and heifers traded 1.00 to 4.00 higher across all classes. Slaughter cows and bulls were too lightly tested for a market trend. Trading activity was moderate to active on good buyer demand.

Philip Livestock Auction - Philip SD

This Week: 2,620

Last Reported: 6,029

Last Year: 4,424

The last Feeder Cattle Sale was three weeks ago therefore no market comparison may be made. Good Demand for Several Strings, Load Lots, and Many Packages of Feeder Steers, Feeder Heifers, and Replacement Heifers which sold on a Strong, Active Market. Nearly the entire Offering was Home Raised, fully vaccinated, weaned a long time. Extremely dry conditions persist around the area but that makes for dry pens and clean, open haired cattle carrying moderate flesh. The next Feeder Cattle Sale is February 22, Expecting 2,500 Head. Supply included: 100% Feeder Cattle (53% Steers, 47% Heifers). Feeder cattle supply over 600 lbs was 65%.

Winter Livestock Auction - Riverton, WY

This Week: 937

Last Reported: 2,017

Last Year: 1,170

Compared to last Tuesday on a special bred cow sale; slaughter cows steady instances 2.00-4.00 higher, slaughter bulls firm with feeder cows steady to higher overtones noted. Not enough feeder calves for a good market test. Demand good with good buyer participation and attendance at bred cows sale.

Miles City Livestock Commission Auction - Miles City, MT

This Week: 1,175

Last Reported: 2,057

Last Year: 519

Compared to last week: The best test for feeder steers was 650-699 lbs which sold mostly 5.00 higher. All other steer calves were too lightly tested either this week or last to develop an accurate market trend, steady to higher undertones were noticed. The best test for heifer calves was for 500-549 lbs which sold 3.00 higher. All other heifers were too lightly tested to develop an accurate market trend, steady to higher undertones were noticed.

Winter Livestock - La Junta CO

This Week: 1,776

Last Reported: 2,583

Last Year: 3,450

Compared with last Tuesday: Steer's under 700 lbs steady to 3.00 higher advance on 550 to 600 lbs , over 700 lbs steady to 1.00 higher. Heifer's under 600 lbs steady to 2.00 higher 600 to 700 lbs steady to 8.00 higher advance on 600 to 650 lbs. over 700 lbs steady. Slaughter cows 5.00 higher. Slaughter bulls steady to 1.00 higher. Trade and demand moderate to good.

OKC West Livestock Auction - El Reno, OK

This Week: 1,000

Last Reported: 4,754

Last Year: 3,477

Compared to last week: Steer and heifer calves sold 6.00-8.00 higher. Demand good to very good. A strong winter storm late last week swept across the trade area hampering livestock movement.

Ozarks Regional Stockyards - West Plains MO

This Week: 980

Last Reported: 3,173

Last Year: 1,854

Compared to last week, steer and heifer calves traded 2.00-7.00 higher with spots 12.00 higher. Yearlings were not well tested, however undertones were steady. Demand was very good on a light supply. Following a week of snow, sleet and ice across the area, receipts were limited with many country roads difficult to travel due to the ice pack and melting snow.

Mid-State Stockyards LLP - Letohatchee, AL

This Week: 1,075

Last Reported: 1,182

Last Year: 652

Compared to one week ago: Slaughter cows and bulls sold unevenly steady. Replacement cows sold steady. Feeder cattle sold 4.00 to 8.00 higher.

Alberta Beef Producers:

Alberta direct cattle sales this week have seen light trade develop with dressed sales ranging from 260.00-275.00 delivered, steady to 5.00 higher than last week. Cattle that traded this week were being scheduled for the middle of March delivery. All three western Canadian packers bought cattle this week. Many producers had more cattle to sell this week but packers were only taking a few loads from each individual. Two packers will work this Saturday.

"Shootin' the Bull" Weekly Analysis:

In my opinion, what a way to end the week? Starting Wednesday, hyper volatility began to run rampant in all markets. From recognition of massive inflation, a woefully behind administration on dealing with such, and Russia knocking on the door of the Ukraine, why shouldn't it have been? To say the least, this has been one more exciting week in the commodities markets. Cattle traders pushed fed cattle futures to new contract highs this week in what appears to be a 5-wave pattern. The new contract highs this week led to recommendations to own the April at the money put and sell an above \$153.00 call. This was a sales solicitation. I am hearing of some push back in the meat markets over the higher prices. As packers lose margin, I believe they are in a position to hold the line at the moment. I am anticipating a slightly higher placement in January, as well as a lower marketing's. This may push the on-feed number back over 100% for a couple of months. The wheat pasture cattle continue to be pulled early. Last week's weather appears to have done nothing to change the drought monitor. While I have been very friendly towards the consumer continuing as is with beef consumption, inflationary factors may begin to impact a few decisions. Especially as worry over conflict in Europe and a woefully inadequate political and financial administration raises concerns. So, with the 5-wave pattern that developed from January 24, to this week, I am anticipating either a mild correction, if this latest up move is only the start of a new wave sequence, or a much larger correction, if it completed the wave sequence that started from the September '21 low. It is just too early to tell at the moment. Nonetheless, I anticipate at least a mild correction of \$2.00 to \$5.00, or a much larger correction that could push April back to \$132.00.

Input costs to cattle feeders just keep soaring. New contract highs in feed, feeder cattle, and fuel are the three "F's" that can inflict significant stress on margins. Pulling more wheat pasture cattle early will make for a hole at the end of the first quarter and front of the second quarter. The factor I consider the most pertinent at the moment is the drought. With no subsiding of, production is not anticipated to change by much. More cows and heifers will come off farms and maybe the consumer will be in a position to increase consumption. It won't be the best scenario in my opinion, however, if the drought subsides, feed costs would be anticipated to plummet, with farmers and ranchers pulling cows and heifers out of the kill cycle and putting them back into the breed cycle. This would make for an instant shortage of cattle to the feed yard and soon the packer. Prior experiences of this can be seen in the US from 2012 to 2016 and Australia from 2018 to 2020. I have made varying recommendations in the feeders due to basis spreads, premium of fall months, and a marketing plan by some that use August futures to hedge against inventory marketed in June and July. Each of these factors are beneficial to certain sectors. To touch on one specifically, I recommend for those that use August futures to hedge sales in June and July to only buy the at the money to \$4.00 lower strike with no sale of a put or call. This is a sales solicitation. I recommend this because the basis could soar prior to marketing the inventory and any short futures or short call would produce losses over and above the depreciation of the put. Therefore, only suffer the depreciation of the put. Potentially, if there is time left, there may or may not be premium still available. Whatever premium is salvaged, makes the loss that much less to write off against the physical sale. Yes, you could use a bear put spread, but this would only be of more benefit if prices rose. If prices fall, the short put will increase in value to a specific extent that may keep the long put from being as valuable. As well, there will be time left on both that again, may not be to your advantage. This is the reason for this recommendation. For months in which you will actually be marketing inventory at the expiration of the contract month, then the premiums on futures contracts and call option premiums above \$200.00, leaves a great deal of basis spread to benefit from. Be sure to explore all the risks associated with this trade. It is a marginable position and there is a belief you will need a great deal of it in this volatile environment.

Grains have soared this week. If there were any confusion that this is a bull market, it was clarified this week. New contract highs for corn and beans, with wheat hot on their trail at the close on Friday. There is little to differ on that there is plenty of grain on hand. The problem is, once sold, it can't be replaced at the same price. Every end user is under the same set of circumstances. That being, fall harvest lows were not by very much and that led to more saying they would wait for a break that has yet to come. Therefore, as production cycles end and new ones started, they have to come to the market to acquire inventory. At present, the highest priced grain would be today. I do anticipate a correction of some kind that may encompass a couple of weeks until we get more information on drought aspects. As the March 31 planting intentions are made known, the weather patterns should hold some clues as to what may transpire next. This has left a lot of grain farmers over a barrel as to how to market into this rally. With seemingly no idea of what input costs may be, the farmer may have a difficult time forward contracting to elevators, or hedging because a fixed price without fixed inputs could turn narrow margins into losses.

The current administration appears woefully inadequate in efforts to control inflation. All debt instruments were sharply lower this week, and why shouldn't they be? Inflation is rampant. As well, equities were sharply lower, and why shouldn't they be? Inflation is sucking investment dollars up like a Hoover vacuum.

This leads me to anticipate a multitude of shock factors that are anticipated to be injected into markets by both the political and financial administrations. Not necessarily in a fashion that would slow or stop inflation, but merely to appear as if something is being done. I likened this week's price action to the markets walking on stilts. I look for multiple attacks to take place in an attempt to knock the stilts out from underneath the markets. Of interest is that on Thursday's significant reversal, and Friday's recovery of commodity markets, it is going to be a task to tumble the markets. They may shake, shimmy and wobble, but like a weeble, they may not fall down. Be astute in this market environment.

Christopher B. Swift is a commodity broker and consultant with Swift Trading Company in Nashville, TN. Mr. Swift authors the daily commentaries "mid day cattle comment" and "Shootin' the Bull" commentary found on his website @ www.shootinthebull.com

An investment in futures contracts is speculative, involves a high degree of risk and is suitable only for persons who can assume the risk of loss in excess of their margin deposits. You should carefully consider whether futures trading is appropriate for you in light of your investment experience, trading objectives, financial resources and other relevant circumstances. PAST PERFORMANCE IS NOT NECESSARILY INDICATIVE OF FUTURE RESULTS.

This week's Feedyard Closeouts...

Closeout projections are for cattle placed on feed by a cattle owner at a commercial feedyard and not for cattle owned by a vertically integrated company, e.g., a beef processing company or a feedyard feeding cattle at cost. Cattle cost, cost of gain, and selling price will vary on a regional basis. Cost includes \$10 per head for freight to feedyard.

Typical closeout for un-hedged steers sold this week:

- Placed On Feed 150 days ago = September 14, 2021
- Projected P/(L) based on the futures when placed on feed: **(\$46.08)**

* Cost of 750 lb. steer delivered @ \$154.60 per cwt:	\$1,169.50
Feed Cost for 600 lbs. @ \$1.14 per lb.	\$684.00
Interest on cattle cost for 165 days:	\$20.43
Interest on feed cost:	\$5.97
Total Cost & Expense:	\$1,879.90
** Sale proceeds: 1,350 lb. steer @ \$141.16 per cwt:	\$1,905.66

This week's Profit/(Loss) per head: \$25.76

Profit/(Loss) per head for previous week:	\$15.10
Change from previous week:	+10.66
Sale price necessary to breakeven:	\$139.25

* CME Feeder Cattle Index ** 5 Area Daily Weighted Average

Projected closeout for steers placed on feed this week:

- Projected Sale Date @ 150 days on feed = July 11, 2022

* Cost of 750 lb. steer delivered @ \$162.64 per cwt:	\$1,229.80
Feed Cost for 600 lbs. @ \$1.18 per lb.	\$708.00
Interest on cattle cost for 165 days:	\$21.48
Interest on feed cost:	\$6.18
Total Cost & Expense:	\$1,965.46
** Sale proceeds: 1,350 lb. steer @ \$139.92 per cwt:	\$1,888.92
This week's Profit/(Loss) per head:	(\$76.54)
Profit/(Loss) per head for previous week:	(\$18.99)
Change from previous week:	-57.55
Sale price necessary to breakeven:	\$145.59

* CME Feeder Cattle Index ** August Live Cattle Futures Contract

Feedyard Close-Outs for the weeks ending...

Typical closeout for hedged steers sold this week:	(\$46.08)
Typical closeout for un-hedged steers sold this week:	\$25.76
Projected closeout for steers placed on feed this week:	(\$76.54)

USDA National Retail Beef Report:

National Summary of Advertised Prices for Beef at Major Retail Supermarket Outlets

This week in beef retail the Feature Rate rose by 1 percent, the Special Rate posted a 4.6 percent increase, and the Activity Index showed a 4.9 percent loss. With Super Bowl parties as well as Valentine's Day coming up, various cuts such as Boneless Ribeye Steaks and Filet Mignons made a strong showing on retail ads this week. Cuts from the Rib, Loin, Brisket, and Ground Beef items saw more ad space, while cuts from the Chuck, and Round saw less. Cattle slaughter under federal inspection was 3.1 percent higher when compared to last week.

Activity Index: 2 Week Comparison

5 Year Bullish/Bearish Consensus Charts from [SentimenTrader](#):

The theory behind the "Bullish/Bearish Consensus" indicator is when the public reaches a consensus, they are usually wrong:

- They get too bullish after prices have risen and too bearish after they have already fallen.

Because of this tendency, there are often extremes in opinion right before major changes in trend:

- When the public reaches a bullish extreme, i.e., a great majority thinks prices will keep rising, then prices often decline instead.
- And when they become too bearish, then prices tend to rise.

So when Public Opinion moves above the **red dotted line** in the chart, it means that compared to other readings over the past year, you're seeing **excessive optimism**. You also want to look at the absolute level of Opinion, too - if it's at 90%, then there's no question we're seeing an historic level of bullish opinion. Watch for readings above 80% (or especially 90%) to spot those dangerous times when the public is overly enthusiastic about a commodity.

Conversely, when Public Opinion moves below the **green dotted line**, then the public is **excessively pessimistic** about the commodity's prospects for further gains compared to their opinion over the past year. Looking for absolute readings under 20% (or especially 10%) often indicates an upturn in the market.

[T. Rowe Price](#)

Small-caps outperform as investors weigh earnings against interest rate fears

After another volatile week, the large-cap indexes ended the week lower, while the S&P MidCap 400 and small-cap Russell 2000 indexes recorded modest gains. The technology-heavy Nasdaq Composite fared worst and ended the week down roughly 15% from its recent peak, still in correction territory. T. Rowe Price traders noted that the tug of war between healthy earnings growth and fears over monetary tightening continued to dominate sentiment. Warnings from U.S. officials that a Russian invasion of Ukraine might be imminent may have also contributed to a late-week sell-off.

Declines in mega-cap technology stocks—including Facebook parent Meta Platforms, Microsoft, and Google parent Alphabet—weighed on the broader indexes on Monday, but the so-called reopening trade helped stocks regain their footing at midweek. Shares in restaurants, hotels, casinos, air and cruise lines, and online travel agency stocks all rallied.

Inflation hits highest level in four decades

Highly anticipated inflation data on Thursday unwound the gains, however. The Labor Department reported that the headline consumer price index (CPI) advanced 7.5% over the year ended January, more than consensus expectations and its highest annual gain since February 1982. Core prices, which exclude food and energy purchases, rose 6.0%, the most since August 1982.

Inflation worries were reflected in the University of Michigan's preliminary gauge of consumer sentiment in February, released Friday morning. At 61.7, the index reading came in well below expectations of roughly 67 and hit its lowest level since October 2011. The survey's chief researcher termed the drop "stunning" and pointed out that "nearly half of all consumers [are] expecting declines in their inflation-adjusted incomes during the year ahead." According to FactSet, roughly three out of four S&P 500 companies that have reported earnings have referred to inflation in their earnings calls, but net margin estimates for the current quarter have fallen only slightly, suggesting that many businesses are successfully passing on higher input costs to customers.

The University of Michigan data seemed to indicate that consumers were not especially comforted by improving COVID-19 trends and the removal of some restrictions. Several states, including California and New York, announced the rollback of mask mandates and vaccine requirements during the week. Amazon.com, the country's largest private employer alongside Wal-Mart, also announced that workers would no longer have to wear masks in its warehouses if they were vaccinated.

Investors price in half-point rate increase in March

The upside CPI surprise, combined with hawkish comments from St. Louis Federal Reserve Bank President James Bullard, sent short-term rates racing higher on Thursday, resulting in a flattening of the yield curve. The two-year U.S. Treasury note yield reached its highest level since January 2020 as investors priced in expectations for an accelerated rate hike schedule by the Fed—including the probability for a 50-basis-point rate increase at the central bank's March policy meeting. Meanwhile, the benchmark 10-year U.S. Treasury note yield surpassed 2.00% for the first time since the summer of 2019. (Bond prices and yields move in opposite directions.)

U.S. Stocks:

Index	Friday's Close	Week's Change	% Change YTD
DJIA	34,738.06	-351.68	-4.40%
S&P 500	4,418.64	-81.89	-7.29%
Nasdaq Composite	13,791.15	-306.86	-11.85%
S&P MidCap 400	2,647.46	24.28	-6.85%
Russell 2000	2,030.15	27.79	-9.58%

U.S. Drought Monitor

February 8, 2022
 (Released Thursday, Feb. 10, 2022)
 Valid 7 a.m. EST

Drought Impact Types:
 ~ Delineates dominant impacts
 S = Short-Term, typically less than 6 months (e.g. agriculture, grasslands)
 L = Long-Term, typically greater than 6 months (e.g. hydrology, ecology)

Intensity:
 None
 D0 Abnormally Dry
 D1 Moderate Drought
 D2 Severe Drought
 D3 Extreme Drought
 D4 Exceptional Drought

Author:
 Deborah Bathke
 National Drought Mitigation Center

The Drought Monitor focuses on broad-scale conditions. Local conditions may vary. For more information on the Drought Monitor, go to <https://droughtmonitor.unl.edu/About.aspx>

Looking ahead...

The National Weather Service Weather Prediction Center forecast (valid February 10 – 15) calls for relatively dry weather over much of the Lower 48. A pair of storms systems are expected to bring snow to the Upper Midwest and Northeast. Much of the continental U.S. will see above normal temperatures through the weekend.

Moving into next week, the Climate Prediction Center (Valid February 15 – 19) Outlooks favor above normal precipitation from the Desert Southwest northeast to the Canadian border. Drier weather is favored for the northern Plains and much of the west. Temperatures are expected to be warmer than normal in the West Coast states, the central and northern Great Plains, and across much of the Lower Midwest and Southeast.

Weekly Grain Market Review:

Grain Markets:

Grain Prices	02/11/22	Last Week	1 Month Ago	1 Year Ago	5 Yr. Avg.
Omaha Corn	6.51	6.21	5.91	5.33	4.12
Kansas City Wheat	7.94	7.57	7.15	5.88	5.17
Grain Futures					
March Corn	6.5100	6.2050	5.9625	5.3875	4.1523
March Wheat	7.9775	7.6325	7.4150	6.3675	5.4208

5 Year Moving Average - Corn & Wheat

Last Week's Trade Data:

Corn:

Net sales of 589,100 MT for 2021/2022 were down 50 percent from the previous week and 43 percent from the prior 4-week average. Increases primarily for Mexico (370,600 MT, including decreases of 20,300 MT), Japan (347,500 MT, including 156,200 MT switched from unknown destinations and decreases of 2,500 MT), Colombia (135,000 MT, including 132,000 MT switched from unknown destinations and decreases of 6,500 MT), Canada (68,000 MT, including decreases of 1,800 MT), and the Dominican Republic (51,700 MT), were offset by reductions primarily for China (375,200 MT) and unknown destinations (144,500 MT).

Exports of 1,149,400 MT were down 2 percent from the previous week and 6 percent from the prior 4-week average. The destinations were primarily to Japan (331,100 MT), China (208,800 MT), Canada (168,100 MT), Mexico (165,100 MT), and Colombia (149,700 MT).

Wheat:

Net sales of 84,800 metric tons (MT) for 2021/2022 were up 48 percent from the previous week, but down 75 percent from the prior 4-week average. Increases primarily for the Philippines (34,600 MT, including decreases of 400 MT), Mexico (33,100 MT, including decreases of 11,400 MT), Panama (24,300 MT, including 25,700 MT switched from El Salvador and decreases of 1,700 MT), unknown destinations (11,400 MT), and Costa Rica (10,400 MT, including 10,100 MT switched from Guatemala), were offset by reductions primarily for Japan (23,500 MT), El Salvador (19,800 MT), and Guatemala (15,200 MT). Net sales of 48,400 MT for 2022/2023 reported for Japan (25,000 MT), Guatemala (14,400 MT), and Mexico (10,000 MT), were offset by reductions for unknown destinations (1,000 MT).

Exports of 380,900 MT were down 1 percent from the previous week, but up 9 percent from the prior 4-week average. The destinations were primarily to South Korea (97,600 MT), Japan (96,200 MT), Mexico (87,400 MT), Panama (25,300 MT), and Singapore (24,200 MT).
