Alberta Beef Producers:

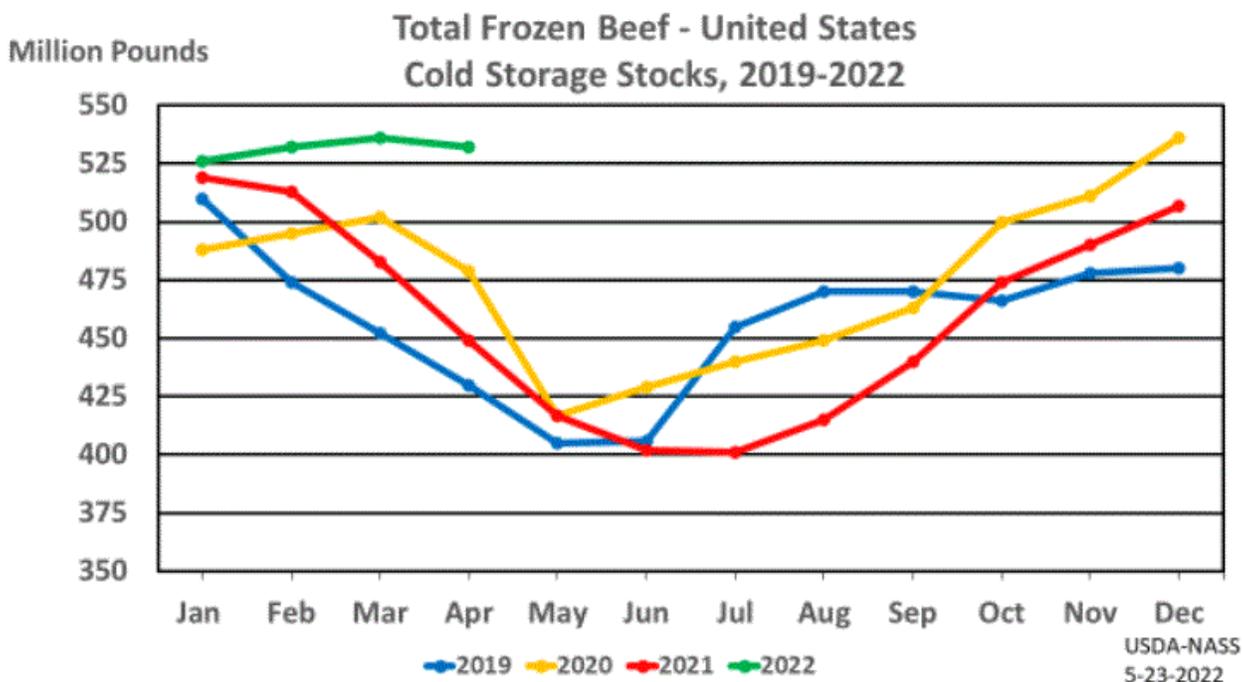

Alberta direct cattle sales Thursday saw light trade develop with dressed sales ranging from 288.00-290.00 delivered, steady to 3.00 lower than last week. Cattle that traded this week were being scheduled for the week of June 27th and July 4th delivery. Following nine consecutive weeks of higher prices weighted average steer prices closed around 1.00 lower this week. With historically large carcass weights and large slaughter volume beef production remains near record large. At least one western Canadian packer will work this Saturday to make up for the Victoria Day holiday.

"Shootin' the Bull" Weekly Analysis:

In my opinion, the cattle market was about as lethargic as one could imagine. Ample inventory on hand, slaughter rates steady, and a consumer being bashed over the head with inflation are factors not helping to promote a higher cash cattle sale. May appears to have been a light placement month. This leads me to anticipate ample inventory into at least September. From there out, the story may change. Until something changes the inflationary aspects, that would increase consumer discretionary spending or funds, I see little reason to anticipate much of anything impacting the packer to pay more for incoming inventory. The next step is to find where or when the cattle feeder will start bidding higher for incoming

inventory. The index has barely moved in weeks now with futures having made phenomenally volatile moves in the same time frame. This is future optimism being met with current no optimism. This is not a pessimistic situation. It is one in which a major production cycle is changing and we are unsure as to what it is changing into. As much as you are tired of me discussing vertical integration, it is very possible that some of the lackluster trading in the live cattle futures market is due to this. Open interest has plummeted in the live cattle as the aspects of price fluctuation decrease as vertical integration increases. In the feeder cattle market, with 3 months to go before the next basis convergence has to take place, anticipate a great deal of volatility. Watch for basis to widen out in the coming weeks and make plans to use this spreading, were it to materialize, to finish locking in any fall marketing's. I know cattlemen are bullish and supplies are tightening beyond the 3rd quarter. However, the current basis, and potentially even wider, offers a great deal of opportunity now, that may or may not exist this fall.

Grains were volatile this week with beans leading the way. Corn and wheat were lower for most of the week, but finished strong. I am looking for almost all of the corn crop to have been planted by Tuesday's crop progress report with beans hot on their heels. Improvement of US wheat conditions, and potential European sales opening, may produce some downward pressure on wheat. I remain uncertain of the next most probable move and believe that actions taken previously will suffice until more information is gathered.

I think the Fed spoke clearly in wanting more rate hikes of half percent each time until inflation subsides. I took it as if to say, it better to be in recession than inflation. Equity traders saw it differently than I, but with energy pushing higher, and most every commodity by weeks end, it appears all the Fed did was spark further inflationary fears. Energy ended sharply higher this week. I am a bit perplexed in not knowing how the Fed or Administration will lower inflation without driving the economy into a recession. Leaving me to anticipate a "pull the rug from underneath your feet", or a "bashing over the head from behind the corner". Consistent rate rises are painfully slow in attempting to quell inflation. Especially as that is the only control over commodity production the Fed or Administration has. The government does not grow crops, make it rain, drill for oil, or refine it. Private and public businesses do (except make it rain) and the encouragement of production is what is needed. Unfortunately, most everything the government is doing and will do, will only go to discourage production with rising costs of money and less of it going around. I fear greatly that the discouragement of government will overcome the encouragement price usually brings to commodity production. I think the oil industry is a good example. Knowing they could most likely utilize more production at current, or even lower prices, but hesitant to do such under the guise that the government will work against them once the supply issues are resolved. So, I think this is why inflation remains for quite some time to come.

This week's Feedyard Closeouts...

Closeout projections are for cattle placed on feed by a cattle owner at a commercial feedyard and not for cattle owned by a vertically integrated company, e.g., a beef processing company or a feedyard feeding cattle at cost. Cattle cost, cost of gain, and selling price will vary on a regional basis. Cost includes \$10 per head for freight to feedyard.

Typical closeout for un-hedged steers sold this week:

- Placed On Feed 150 days ago = December 28, 2021
- Projected P/(L) based on the futures when placed on feed: **(\$62.92)**

* Cost of 750 lb. steer delivered @ \$161.35 per cwt:	\$1,220.13
Feed Cost for 600 lbs. @ \$1.33 per lb.	\$798.00
Interest on cattle cost for 165 days:	\$21.31
Interest on feed cost:	\$6.97
Total Cost & Expense:	\$2,046.40
** Sale proceeds: 1,350 lb. steer @ \$141.01 per cwt:	\$1,903.64
This week's Profit/(Loss) per head:	(\$142.77)
Profit/(Loss) per head for previous week:	(\$121.13)
Change from previous week:	-\$21.64
Sale price necessary to breakeven:	\$151.59

* CME Feeder Cattle Index ** 5 Area Daily Weighted Average

Projected closeout for steers placed on feed this week:

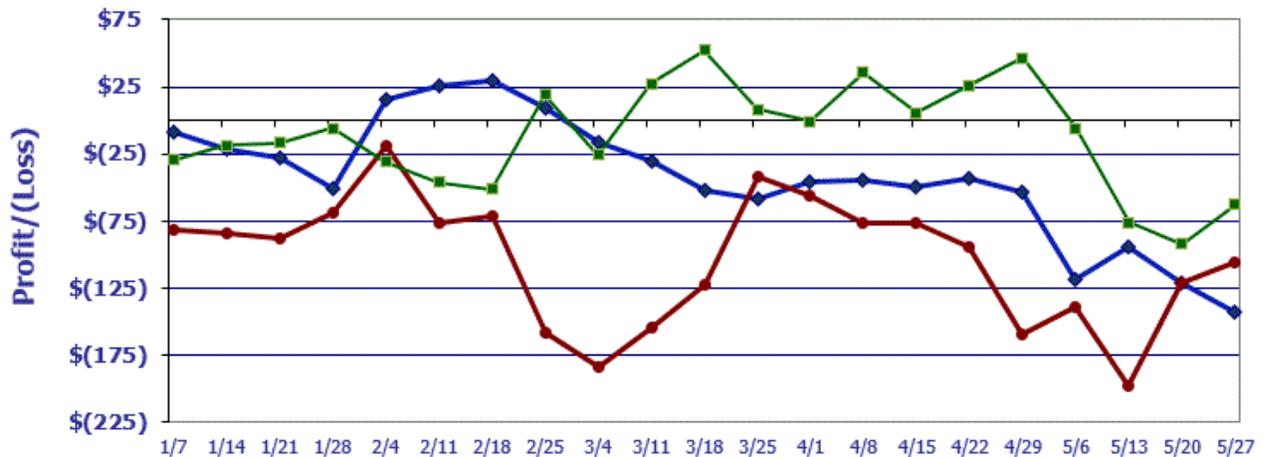

- Projected Sale Date @ 150 days on feed = October 24, 2022

* Cost of 750 lb. steer delivered @ \$153.80 per cwt:	\$1,163.50
Feed Cost for 600 lbs. @ \$1.42 per lb.	\$852.00
Interest on cattle cost for 165 days:	\$23.91
Interest on feed cost:	\$8.75
Total Cost & Expense:	\$2,048.16
** Sale proceeds: 1,350 lb. steer @ \$143.90 per cwt:	\$1,942.65
This week's Profit/(Loss) per head:	(\$105.51)
Profit/(Loss) per head for previous week:	(\$121.78)
Change from previous week:	+16.27
Sale price necessary to breakeven:	\$151.72

Last Week's Trade Data:

Beef:

Net sales of 20,000 MT for 2022 were down 14 percent from the previous week, but up 3 percent from the prior 4-week average. Increases were primarily for Japan (8,400 MT, including decreases of 500 MT), South Korea (3,900 MT, including decreases of 700 MT), China (2,500 MT, including decreases of 100 MT), Hong Kong (1,900 MT, including decreases of 100 MT), and Canada (700 MT, including decreases of 100 MT).

Exports of 17,500 MT were down 12 percent from the previous week and 10 percent from the prior 4-week average. The destinations were primarily to Japan (5,200 MT), South Korea (4,500 MT), China (2,500 MT), Taiwan (1,500 MT), and Mexico (1,100 MT).

Pork:

Net sales of 36,700 MT for 2022 were up 52 percent from the previous week and 39 percent from the prior 4-week average. Increases primarily for Mexico (15,100 MT, including decreases of 400 MT), Canada (5,700 MT, including decreases of 400 MT), China (5,300 MT, including decreases of 300 MT), Japan (3,600 MT, including decreases of 100 MT), and Colombia (2,700 MT, including decreases of 100 MT), were offset by reductions for El Salvador (100 MT). Total net sales of 100 MT for 2023 were reported for Australia.

Exports of 33,000 MT were up 6 percent from the previous week and 4 percent from the prior 4-week average. The destinations were primarily to Mexico (13,700 MT), China (5,200 MT), Japan (4,700 MT), South Korea (2,900 MT), and Canada (1,600 MT).

USDA National Retail Beef Report:

National Summary of Advertised Prices for Beef at Major Retail Supermarket Outlets

This week in Beef Retail the Feature Rate was 1.4 percent higher, the Special rate posted 5.3 percent gains, while the Activity Index declined by 10.3 percent. Memorial Day officially kicks off the grilling season this weekend, as retailers are offering a variety of grilling cuts for consumer to enjoy. Cuts from the Rib, Loin, Brisket, and Ground Beef saw the most ad space, while cuts from the Chuck and Round saw less. Cattle Slaughter under federal inspection was 5.3% lower when compared to last week.

Activity Index: 2 Week Comparison

[^ Contents](#)

Est. Weekly Meat Production Under Federal Inspection:

Total red meat production under Federal inspection for the week ending Saturday, May 28, 2022 was estimated at 1046.1 million lbs. according to USDA's Marketing Service. This was 4.3 percent lower than a week ago and 2.0 percent higher than a year ago. Cumulative meat production for the year to date was 1.8 percent lower compared to the previous year.

5 Year Bullish/Bearish Consensus Charts from [SentimenTrader](#):

The theory behind the "Bullish/Bearish Consensus" indicator is when the public reaches a consensus, they are usually wrong:

- They get too bullish after prices have risen and too bearish after they have already fallen.

Because of this tendency, there are often extremes in opinion right before major changes in trend:

- When the public reaches a bullish extreme, i.e., a great majority thinks prices will keep rising, then prices often decline instead.
- And when they become too bearish, then prices tend to rise.

So when Public Opinion moves above the **red dotted line** in the chart, it means that compared to other readings over the past year, you're seeing **excessive optimism**. You also want to look at the absolute level of Opinion, too - if it's at 90%, then there's no question we're seeing an historic level of bullish opinion. Watch for readings above 80% (or especially 90%) to spot those dangerous times when the public is overly enthusiastic about a commodity.

Conversely, when Public Opinion moves below the **green dotted line**, then the public is **excessively pessimistic** about the commodity's prospects for further gains compared to their opinion over the past year. Looking for absolute readings under 20% (or especially 10%) often indicates an upturn in the market.

Stock Markets & Economic News:

[T. Rowe Price](#)

The large-cap S&P 500 Index and the tech-heavy Nasdaq Composite Index gained ground, breaking a string of seven consecutive weekly declines. Every sector in the S&P 500 advanced, with consumer discretionary and energy stocks performing especially well. The health care sector lagged. This cross-sector strength appeared to reflect optimism that inflationary pressures could be peaking.

Signs of softening in some economic data

Inflationary pressures contributed to some softening in early readings for U.S. purchasing managers' indexes (PMIs) that are based on roughly 85% of survey responses. The S&P Global Flash U.S. PMI receded to 57.5 in May, down from 59.2 in April. (PMI readings greater than 50 indicate an expansion in activity.) Manufacturing output and new orders were strong, but the survey indicated that input costs and output charges also increased meaningfully. On the services side of the economy, the flash PMI reading came in at 53.5, down from 55.6 in the preceding month. New sales growth slowed, while input costs increased to the highest level on record.

Meanwhile, the U.S. Commerce Department reported that nondefense capital goods orders, excluding aircraft, increased 0.3% sequentially in April—a slowdown from the 1.1% recorded in March and a possible indication that business investment may be moderating. The April data from the Census Bureau showed that core durable goods orders, which exclude transportation, likewise grew 0.3%. This print was below expectations.

Few surprises in Fed minutes; consumer spending remains solid despite inflation

The minutes from the early-May meeting of the Federal Open Market Committee contained few surprises, with all members voicing support for 50-basis-point rate increases over the next few meetings in an effort to bring interest rates to a neutral level that neither inhibits nor stimulates economic growth. Some participants indicated that a more “restrictive” approach to tightening monetary policy could be in order, depending on how the economic outlook evolves.

The core personal consumption expenditures price index, which excludes food and energy, ticked up 0.3% in April, in line with expectations and little changed from the preceding three months. On an annual basis, this inflation metric came in at 4.9%, a moderation from March's 5.2% reading. Personal consumption expenditures grew at a faster pace than inflation, increasing 0.9% sequentially in April.

Looking ahead...

A strong upper-level low pressure system slowly moved across the Plains during May 24 and 25, spreading heavy rain over the southern and central Plains to Lower and Mid-Mississippi Valley. This weather system, with its surface low and fronts, will move slowly eastward during the next several days. Another upper-level low pressure system will move from the Pacific Ocean into the western CONUS by Sunday. In addition to the 1+ inches of rain that has already fallen across the Plains to Mississippi Valley May 24-25, another 1 to 2 inches is expected from the Mississippi Valley to Appalachians and northward to the Great Lakes through May 31. An inch or more of precipitation is forecast for the Pacific Northwest to northern Plains and parts of the Interior Basin in association with the western weather system. Little to no precipitation is expected through May 31 for southern states in the West, and no additional precipitation is forecast for Texas and western portions of the southern High Plains. Warmer-than-normal temperatures are forecast for May 26-31 for the central to southern Plains ahead of the western weather system, while clouds and rain will keep high temperatures near to cooler than normal in the West and East.

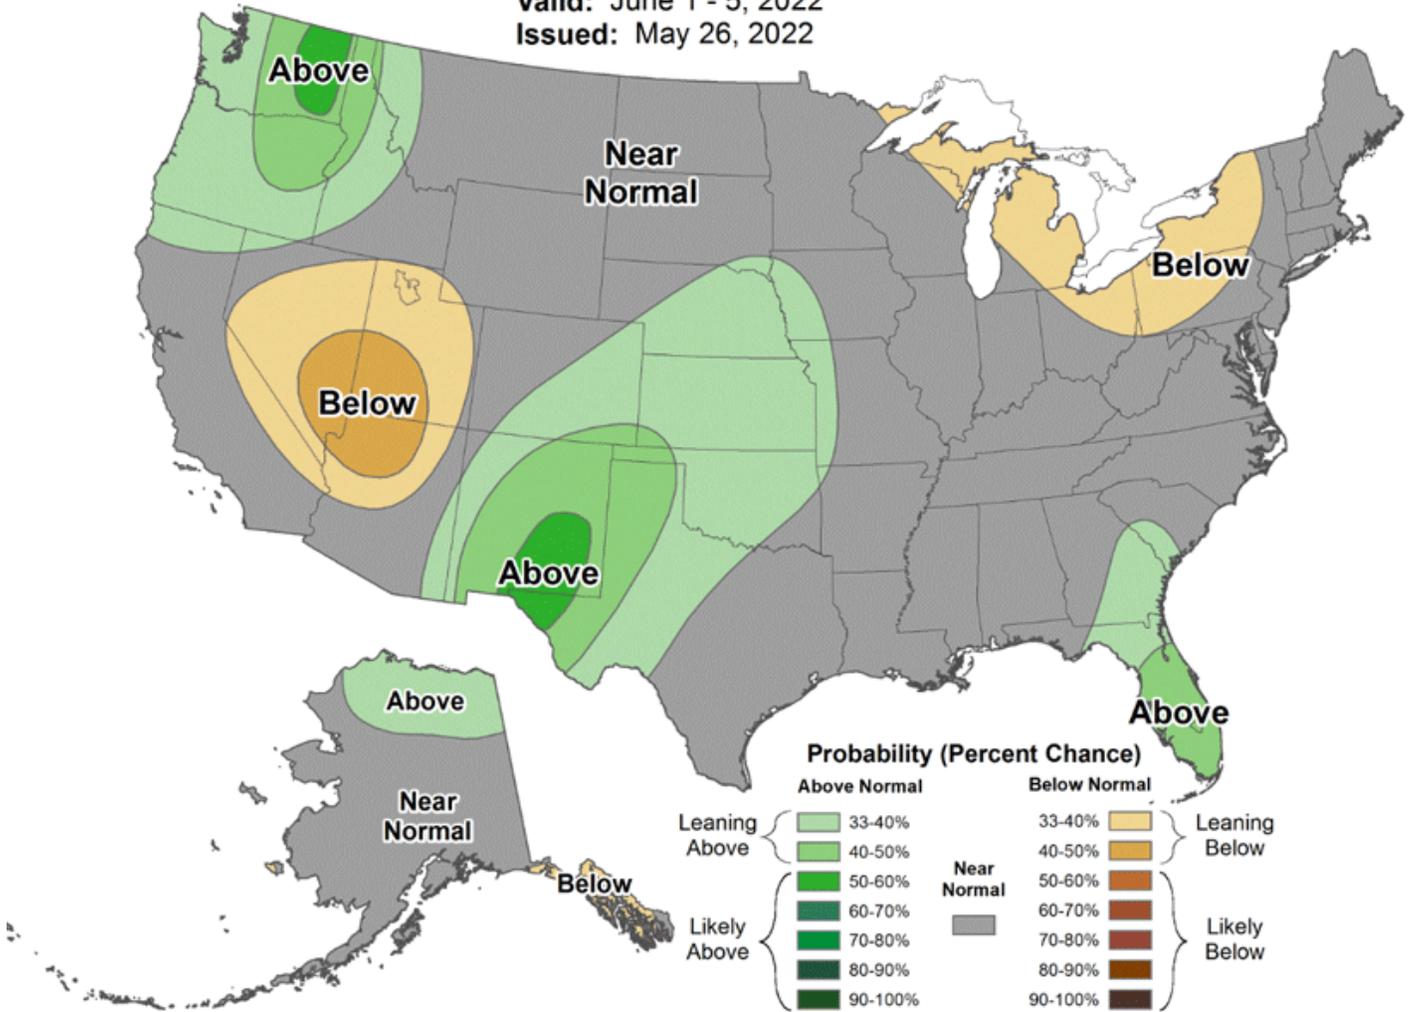

For May 31-June 4, odds favor above-normal precipitation in the Pacific Northwest, Great Plains, Southeast, and most of Alaska, but below-normal precipitation for the Midwest to Northeast and California to southern Nevada. Warmer-than-normal temperatures are likely for May 31-June 4 across most of Alaska and the eastern half of the CONUS, while odds favor cooler-than-normal temperatures from the Great Basin to northern Plains.

Last Week's Trade Data:

Corn:

Net sales of 151,600 MT for 2021/2022--a marketing-year low--were down 63 percent from the previous week and 73 percent from the prior 4-week average. Increases primarily for Japan (112,900 MT, including 148,100 MT switched from unknown destinations and decreases of 39,600 MT), Colombia (55,900 MT, including 53,000 MT switched from unknown destinations and decreases of 2,300 MT), Venezuela (20,600 MT, including decreases of 1,100 MT), Canada (20,100 MT, including decreases of 2,500 MT), and Mexico

(17,200 MT, including decreases of 11,700 MT), were offset by reductions primarily for South Korea (57,000 MT), unknown destination (54,900 MT), and China (23,000 MT). Net sales of 58,300 MT for 2022/2023 reported for unknown destinations (36,800 MT) and Costa Rica (32,600 MT), were offset by reductions for Mexico (11,200 MT).

Exports of 1,821,100 MT were up 34 percent from the previous week and 15 percent from the prior 4-week average. The destinations were primarily to China (793,000 MT), Japan (352,200 MT), Mexico (308,500 MT), Canada (75,500 MT), and South Korea (63,300 MT).

Wheat:

Net sales reductions of 2,300 metric tons (MT) for 2021/2022--a marketing-year low--were down noticeably from the previous week and from the prior 4-week average. Increases primarily for Italy (20,000 MT), Nigeria (8,200 MT), the Philippines (5,500 MT), Canada (2,900 MT), and Japan (1,700 MT, including decreases of 1,100 MT), were more than offset by reductions for Mexico (38,200 MT) and unknown destinations (2,700 MT). Net sales of 246,300 MT for 2022/2023 primarily for the Philippines (60,000 MT), Japan (59,600 MT), Taiwan (40,000 MT), Mexico (36,800 MT), and Honduras (32,000 MT), were offset by reductions for unknown destinations (1,000 MT) and Nigeria (1,000 MT).

Exports of 298,200 MT were down 14 percent from the previous week and 1 percent from the prior 4-week average. The destinations were primarily to Japan (110,000 MT), Mexico (84,700 MT), the Philippines (60,500 MT), Nigeria (41,800 MT), and Canada (800 MT).
